Powerful 64-bit architecture

Significantly boost performance with an all-new 64-bit architecture. Effortlessly work on long, complex XML and non-XML documents with better memory management and a larger memory space. Publish up to 65% faster to PDF and Responsive HTML5.

Interactive real-time progress bar

Now know the status of tasks like book updates and PDF generation with information-rich, easy-to-understand progress indicators at every stage.

New image transparency support

Publish clean, stunning documents with support for image transparency to blend text with pictures, and pictures with pictures.

Out-of-the-box SharePoint 2016 support

Instantly connect to Microsoft SharePoint Online or a SharePoint 2016 CMS.

Quick access to Welcome Screen

Open the Welcome Screen in a new tab via the workspaces drop-down menu to easily access templates, plug-ins, customizations, and more.

[Learn more ›](#)

New Duden dictionary support

Get out-of-the-box support for Duden, a trusted German dictionary, for more accurate spelling and hyphenation.

[Learn more ›](#)

Interactive HTML5 dialogs for plug-ins

Make the customer experience richer by using HTML5, CSS3, and JavaScript to make interactive plug-in dialog boxes.

One-click image resizing

Fit an image to a frame or vice versa by simply right-clicking on the image or frame.

[Learn more ›](#)

WebP image support

Take advantage of Google's modern WebP image format. It allows you to use high-quality visuals that load faster thanks to a smaller file size (compared to JPEG or PNG).

[Learn more ›](#)

More control over PDFs

Have more control over print settings like marks and bleeds and other PDF output settings across documents and projects.

[Learn more ›](#)

Password-protected PDFs

Prevent unauthorized access by setting passwords for PDFs directly while publishing.

[Learn more ›](#)

Effortless EDD creation

Generate an EDD using the easy-to-use rich HTML user interface, with the ability to specify DITA constraints. Customize the default RNGs for DITA 1.3.

[Learn more ›](#)

DITA OT 3.0 support

Leverage out-of-the-box support for DITA OT 3.0 to seamlessly publish content in various formats, including PDF, HTML, Microsoft HTML Help (CHM), and Java Help. Use the free OASIS DITA-OT plug-in to carry out DITAVAL-based filtering while publishing.

[Learn more >](#)

XSLT 3.0 support

Create a variety of transformation scenarios by applying predefined or customized XSLT to XML files, and execute them using a range of JAXP-compliant processors. Define the scope of the transformation—a file, all files in a folder, DITA map, or all children of a book. XSLT 3.0 support is provided via Saxon Enterprise Edition 9.8.3, which is bundled with Adobe FrameMaker (2019 release).
